

### INSTRUCTIONS:

Trace your hand and some of your wrist using the pencil.

Using your pen, draw straight lines from the edge of the paper to the outline of your hand.

When you reach your outline draw a curved line to the other side of your outline. Then continue with the straight line to the edge of the paper.

Repeat until there are lines covering the paper.

To make your picture 3D, choose 3 colouring pencils and fill the gaps between the lines. It works best to do this in a pattern.

### EQUIPMENT:

- Paper
- A Pencil
- A Dark Pen
- Colouring Pencils

### TOP TIP:

When tracing your hand, remember to do this lightly with the pencil.
