

### INSTRUCTIONS:

1. Start with a rectangular sheet of paper and turn it landscape
2. First you are going to make the handle. To do this measure 1 inch in from the edge at the side of the paper. Draw a line and cut along it. Put this piece to one side.
3. Fold the paper in half, lengthwise.
4. Measure one inch down from the top and draw a horizontal line across the paper.
5. Starting from the folded edge at the bottom, measure 1 inch from the side and make a faint mark.
6. Cut a straight line up to the line you have just drawn from the mark you made.

### INSTRUCTIONS:

7. Continue to measure 1 inch along the bottom and cut from the marks to the line at the top.
8. Unfold the paper, your slits will now be in the middle. Rub off any marks you made.
9. Decorate the top and the bottom edge using the materials you have chosen, or you might like to paint your paper to decorate it.
10. To finish your lantern, roll it into a tube shape until your long edges overlap at least  $\frac{1}{2}$  an inch. Staple or cello tape the edges together to secure.
11. Now you can attach your handle.

### EQUIPMENT:

- Coloured Paper
- A pencil
- Scissors
- String
- Ruler
- Cello tape/Stapler
- Craft Materials (Optional for decoration)
