

PAPER PLATE PICTURE FRAME

INSTRUCTIONS:

Cut the centre out of your plate, leaving the patterned edge intact.

Place the plate on a piece of paper or card and trace around the inside of the plate. This is now your background template. Now trace around the outside of the plate so the paper is the right side.

Decorate the inside of your smaller circle to create your picture. You will also need to decorate your paper plate frame.

Leave your picture and frame to dry. Once dry, stick your frame onto your paper or card.

You can then make a hole in the top and thread string through so you can hang your frame up.

EQUIPMENT:

- Paper or Card
- Glue
- Paint
- Scissors
- String
- Paper Plate
- Craft Materials
- Hole Punch (optional)

TOP TIP:

If you have a laminator at home, you can laminate your picture (if it is flat). This will make it shiny.

You could also laminate a sheet of the laminating paper to create a 'glass panel' for your frame.
