

GARDEN SOUP

INSTRUCTIONS:

Before doing this activity, you will need to go outside and find the ingredients for your Soup! Remember not to pick any living things!

Once you have got the ingredients, it is time to start making the soup.

Name each of the items in, can you make up a unique name for them instead of just grass?

If your ingredients are too big, use the scissors to cut them up.

Once the main ingredients have been added, add a little bit of water and see what happens. What does it look like? How does it smell?

Continue to add water or ingredients until the soup is ready to serve!

EQUIPMENT:

- Scissors
- Cups
- Mixing Utensils
- Bowls
- Natural Resources

NEXT STEPS:

Can you make a magical story as you make your Garden Soup?

By breaking leaves up before adding them you can create different smells.

Are there any animals that might like to eat the Garden Soup?

If the soup has too much water, what can you do to make it thicker?
