

INSTRUCTIONS:

You need one person to control the 'Play Zone', you can then have as many other players as you want.

One player needs to put their coloured objects in a horizontal line in whichever order they wish. (Remember no one else can see this).

The other players need a replica set of objects. The players who are guessing need to take it in turns to try and guess the order of the coloured objects in the play zone.

If a coloured object is positioned correctly then the matching object that is hidden will be revealed.

The player who matches the order first wins the game.

EQUIPMENT:

- ❑ Coloured Cones or Paper (These need to be 5 different colours)

TOP TIP:

If you want to make this game more Physical, do it outside where you might have more space. You can then run up to the playing zone.

You can also play this game using smaller objects that can be hidden under cups.
